SKILLS

Python C

Gofer(Functional language)

Assembly language(NASM)

React Native

PostgreSQL

RDBMS

Machine Learning In Python

Linux GitHub

INTERESTS

Software Developer/Engineer

EDUCATION

Master of Computer Application Savitribai Phule Pune University

07/2018 - Present

CGPA : 6.46

Bachelor of Computer Science Camp Education Society

06/2015 - 04/2018

CGPA:6.95

WORK EXPERIENCE

Internship

DATEN AND WISSEN PRIVATE LIMITED

07/2020 - 11/2020

MUMBAI

Project

- Web Development, Python Programming

PERSONAL PROJECTS

1) Medicine Box - Mobile Application

- Programming language: React-Native, Redux, Firebase, Machine learning (python), MongoDB
- Description: Some time same health problem occurs before in family and we already have that medicine in our first-aid box but unknowingly we brought same medicine again and some times unknowingly we take dosage of expired medicine because we unaware of medicine's expiry date. Another fact is headache to distinguish pill because of same colour and same size. So we are created one mobile application that solve all above issues.
- Outlook: <https://www.figma.com/proto/WPzFC2KxneFGdq0mYfe0nv/Medicine-Box?node-id=292%3A148&scaling=min-zoom>

2) Extension Distribution

- Programming language: "Python".
- Description: It is create directories according to the extension of present files in one directory. Then in that present directory all files goes to the respective newly created directories according to extension.

3) Zip And Unzip Text File

- Programming language: "Python".
- Description: Using huffman coding technique zip and unzip text file

ACTIVITY PROJECTS

1) Clock Synchronization (Lamport's Algorithm)

- Programming language: "Erlang".
